NOTE TO RESEARCHERS

DEFENSE CONTRACT ACTION DATA SYSTEM (DCADS)  
Procurement Coding Manual for FY 1976.

On this date I spoke with Vicki Brooks from the Office of the Secretary of Defense concerning the Procurement Coding Manual for the DCADS Master File for FY 1976. I indicated that the Procurement Coding Manual we received for this file appeared to cover the period FY 1977. On the cover of the Procurement Coding Manual it says "Revised as of October 1976". Ms. Brooks indicated that she had checked with her boss and that he indicated that this Procurement Manual was, in fact, the Procurement Manual for FY 1977. However, he also indicated that there were no changes between the Procurement Coding Manual for FY 1976 and the Procurement Coding Manual for FY 1977. Ms. Brooks stated that the Procurement Coding Manual, "Revised as of October 1976", could be used with the DCADS Master File for FY 1976 and the DCADS Master File for FY 1977.

Dear Mr. Conrad

This is in response to your letter dated December 22, 1992, requesting additional information on the Defense Contract Action Data System (DCADS) data for fiscal years 1976 through 1985, and provides answers to the problems you described.

Enclosure 1 contains a general overview of the data, which may aid you in your understanding of the data. Enclosure 2 contains your list of problems encountered for each of the fiscal years and answers, or information about where to find answers to the questions you stated. Enclosure 3 provides additional footnoted information about the data for each of the fiscal years, and is intended to explain the code changes that may have occurred from fiscal year to fiscal year within one of the five DCADS data formats. Finally, Enclosure 4 contains a record layout of the ZARK locator and contractor files, and is intended to provide answers to the many questions you had concerning the ZARK data.

If I may be of further assistance, please let me know. My point of contact concerning this matter is Mr. Russell Daul, who may be reached at (703) 746-0786.

Enclosures:  
As stated

### Purchasing Office Codes

1. Prior to calendar year (CY) 1980, the source document for the purchasing offices was the DoD Procurement Coding Manual (4105.61M), Volume III, "DoD Purchasing Offices," which was available from each of the Military Departments and the Defense Logistics Agency. Please see the enclosed list (Attachment 1). Then, beginning in CY 1980, the Directorate for Information Operations and Reports (DIOR) began to publish its own source document for the purchasing offices. The document's title is Department of Defense Defense Acquisition Management Data System Purchasing Offices List (MN01). The oldest version of this document available within the Directorate for Information Operations and Reports (DIOR) was published in CY 1985, and was provided to you previously.

2. Prior to fiscal year (FY) 1979, four characters were used to represent the purchasing offices. In FY 1979, the Navy began to use five characters to represent their purchasing offices; therefore, in FY 1979, the field size was also expanded to five positions. Then, in FY 1984, an additional position was added. The additional position (or first position) was used to represent the department or service. The field became known as the POFKEY, or purchasing office key.

### Additional Fields

Additional fields were also added in FY 1984, such as the LPLAKEY and LPARTIKEY. The LPLAKEY and LPARTIKEY were based on the Federal Information Processing Standard (FIPS) 55-2 publication, which is administered by the Department of the Interior, United States (U.S.) Geological Survey. The code contains information on each place located in the U.S. and the U.S. outlying areas. The first two positions represent the state, and the remaining five positions represent the city. The LPLAKEY is a code which represents each unique place, and the LPARTIKEY is a code which is macro to the LPLAKEY, and represents one or more places. For example, the Pentagon is a place, but it is part of Arlington which represents one or more places. Therefore, the place name in the file would be for Arlington, and not the Pentagon (Attachment 2).

### DD Form 1057 Data

Beginning in FY 1984, files began to contain summary, DD Form 1057 data; this may help explain why some of the fields are blank where you are expecting coded information. The IDKEY for the DD Form 1057 data contains all zeroes.

### ZARK vs. DUNS

The FY 1983 file contains both ZARK codes and Dun and Bradstreet (D&B) numbers (DUNS) information; however, in FY 1983, the DUNS were optional and we did not officially begin collecting this information until FY 1984. Also,

until FY 1984, the contractor name used in the files was based on the name contained in the ZARK contractor file; however, beginning in FY 1984, the contractor name in the file was based on DUNS file. Also, it is important to note that the DUNS name is always the headquarters name (and not the establishment name), and that the DUNS information is proprietary - only available from D&B. Therefore, to obtain such information, we suggest that you contact D&B directly at the following:

#### ISA Region Codes

DIOR stopped using ISA region codes in FY 1984. The first position of the Labor Surplus Area (ISA) region code is explained in the Defense Acquisition Management Data System (DAMDS) Code Translation Manual for Computer Listings (FYs 1976 through 1978) or Defense Acquisition Management Data System (DAMDS) Code Translation Manual (FYs 1979 through 1983). Positions two and three identify a specific ISA within the state. No further ISA information is available within DIOR. To obtain such information, we suggest you contact the following individuals at the U.S. Department of Labor: Mr. Bill Mc Garrity at (202) 219-5185 or Mr. Doug Mc Culley (202) 219-4336.

#### Dollar Value Field

The Dollar value fields in the DCADS datasets contain signed data. If the right-most position of the field contains a number (0-9) or a letter (A-I), the dollar value is positive. The "A" represents the positive number 1; "I" represents the positive number 9; positive zero is always 0. However, if the right-most position of the field contains a letter (J-R) or the left bracket symbol ")," the dollar value is negative. The "J" represents the negative number 1; "R" represents the negative number 9; the negative zero is the ")" symbol.

#### Fiscal Year Conversion

Between FYs 1976 and 1977, the Government's fiscal year changed from July 1 - June 30 to October 1 - September 30. At the time, 76 was the code used to represent the data for the July to June timeframe, and 7T was the code used to represent the data for October to September timeframe.

### Dataset Structures

There appears to be some confusion as to which DCADS data pertains to which dataset formats. There were only five formats for the fiscal year time periods in question (1976 through 1985). The 1976 dataset format (DCADS76.XLS as you call it) pertains to DCADS data from FY 1976 through FY 1978; the 1979 dataset format (DCADS79.XLS) pertains to DCADS data from FY 1979 through FY 1982; the 1983 dataset format (DCADS83.XLS) pertains only to DCADS data for FY 1983; the 1984 dataset format (DCADS84.XLS) pertains only to DCADS data for FY 1984; and finally, the 1985 dataset format (DCADS85.XLS) pertains only to the DCADS data for FY 1985. Please also see Enclosure 3 for more detailed information concerning the differences among the fields of the DCADS data from fiscal year to fiscal year within a given DCADS dataset format.

**SECTION I - CODING FOR ITEM 10A OF DD FORM 350  
(FEDERAL SUPPLY CLASS OR SERVICE CODE)**

General. A 4-digit code, as provided by this Section I, shall be entered in Item 10A of every procurement action reported on DD Form 350. Only one code number shall be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (See also ASPR 21-116).

If the action is for research, development, test or evaluation work (RDTE), enter a code from Part A of this Section. RDTE is defined in ASPR 4-101. Do not assign a RDTE code to supplies or housekeeping services purchased in support of "in-house" research or development work; such supplies are coded in accordance with Part C of Section I and the services in accordance with Part B. Procurement personnel responsible for coding RDTE actions shall obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

If the action is for services other than RDTE work, enter a code from Part B of Section I, and if it is for supplies, enter a code from Part C.

**PART A - RESEARCH, DEVELOPMENT, TEST AND EVALUATION (RDTE)**

Purpose. The DD Form 350 codes in this Part A have been developed to coincide with the RDTE Program Elements in the Department of Defense Programming System. In the case of the Army and Navy, these codes also coincide with Departmental Budget Program Activity Codes (BPAC), while for Air Force they are related to the first two digits of the BPAC. Accordingly, it will be possible to analyze procurement figures in terms of DOD Programs and broad Budget Activities.

Description. The DD Form 350 code consists of four digits as indicated in the following example:

The first digit is always the letter "A" which identifies a RDTE contract; the second digit which may be numeric or alphabetic, identifies the following eight budget activities and a miscellaneous category.

- |                               |   |
|-------------------------------|---|
| 1, A, J Military Sciences     | 5, E, N Ships and Small Craft               |
| 2, B, K Aircraft              | 6, F, P Ordnance and Combat Vehicles        |
| 3, C, L Missiles              | 7, G, Q Other Equipment                     |
| 4, D, M Military Astronautics | 8, H, R Program-wide Management and Support |

The third digit is a letter or number identifying the specific RDTE element. The fourth digit is numeric from 1 to 6 and identifies the following categories of RDTE defined in ASPR 4-101. Note that first two positions of Program Element also identify the appropriate category for RDT&E.

| 65   | 6. Management and Support   | (8)                      |

The title of each code is the Program Element description which has been abbreviated for machine processing to fit within 29 digits.

Selection of Appropriate Code. Each Department shall use only that subdivision of Part A designated for it, i.e., Part A(1) for Army, Part A(2) for Navy and Part A(3) for Air Force. It will be noted that separate codes are provided in each of these subdivisions for reporting contracts placed for DARPA and NASA. An "All Other" code is provided for contracts which have not been assigned a specific Budget Activity or Program Element Code, or which bear a security classification prohibiting unclassified disclosure of the program element title in combination with other DD Form 350 items.

To determine the appropriate DD Form 350 code, check the contract or purchase request for:

1. The appropriation symbol to insure that the contract is for RDTE. (Do not include housekeeping supplies or services in support of in-house RDTE even though a RDTE appropriation symbol is cited.) The following symbols are currently applicable.

|              |                   |
|--------------|-------------------|
| Army 21X2040 | Air Force 57X3600 |
| Navy 17X1319 | DARPA 97X0400.13  |
| NASA 80X0108 |                   |

2. Part A(1) is arranged numerically by Program Element Number within each Budget Program. Part A(2) is arranged numerically by Budget Activity and Navy Program Element Code preceded by the fiscal year in which the Navy Program Element Code was assigned. Part A(3) is arranged numerically by Program Element Code. The corresponding DD Form 350 code for Item 10A appears in the last column of each section.

3. Specific Type of Research where the same BPAC, Subhead/Project or PEN has been assigned to more than one DD Form 350 category. This applies only to Army BPAC 611102 and 685801, Navy Activity Subhead 1 Project 12 and Air Force PEN 6 11 02 F.

When a specific BPAC, Subhead/Project Number or PEN is not given, as in the case of DARPA, DNA, NASA or "All Other," it will be necessary to determine from the description of the RDTE the appropriate DD Form 350 code to assign. In this connection, requisitioning personnel shall furnish sufficient information to permit accurate coding.

## PART B - OTHER SERVICES AND CONSTRUCTION

All services except RDTE work shall be coded in accordance with Part B. Each category is assigned a series of 4-digit codes for specific types of services and construction. The code consists of a letter identifying one of the 15 categories listed below, and 3 numeric digits identifying a specific service within each category.

- J. Maintenance and/or Repair of Equipment
- K. Modification, Alteration and/or Rebuild of Equipment
- L. Technical Representative Services
- M. Operation and/or Maintenance of Government-Owned Facility
- N. Installation of Equipment
- P. Salvage Services
- Q. Medical Services
- R. Architect, Engineer, Expert, and/or Consultant Services
- S. Housekeeping Services
- T. Photographic, Printing, and Publication Services
- U. Training Services
- V. Transportation Services
- W. Lease or Rental, except Transportation Equipment
- Y. Construction
- Z. Maintenance, Repair and Alteration of Real Property

## PART C - SUPPLIES AND EQUIPMENT

All supply and equipment items will be coded in accordance with this part. Except for the Ships Category (FS Group 19), the classifications used are those contained in the H-2 series of cataloging handbooks, covering the Federal Supply Classification system, and personnel should refer to these handbooks for a complete description of the codes. In the case of ships, a more detailed code is provided herein than is shown in the H-2 handbooks.

## SECTION II - CODING FOR ITEM 10B OF DD FORM 350 (SYSTEM OR EQUIPMENT)

Purpose. The DD Form 350 codes in this Section II have been developed to facilitate analysis of DoD procurement by major weapon system, equipment or item. Only production items are covered by this coding system: RDTE work is excluded since it is covered by Section I, Part A of this manual. In addition to RDTE, codes in this section are not applicable to Construction, Subsistence, Clothing/Textiles or Petroleum. Codes generally have been assigned to all production items whose annual programmed procurement is \$2,000,000 or more. Accordingly, if an end item or a component identifiable to an end item cannot be identified with a specific code, a request for a code together with the applicable DD Form 350 should be addressed to the appropriate organization specified in ASPR 21-103(b). Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

Description and Use. The DD Form 350 code, consisting of three alphabetical digits, is shown in the first column of Section II. The first digit identifies one of the following major categories of equipment:

- |                       |                    |
|-----------------------|--------------------|
| A. Aircraft           | E. Weapons         |
| B. Aircraft Engines   | F. Ammunition      |
| C. Missiles & Rockets | G. Electronics     |
| D. Vehicles           | H. Other Equipment |
| S. Ships              |                    |

The second digit identifies a subdivision of the major category, e.g., Fighter Aircraft, and the third digit identifies the specific item, e.g., F-111.

Normally each system or equipment code shall include all subsystems, components, repair parts, modifications, repairs and related supplies and services (other than RDTE and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines. If a procurement is for components, parts, or services covering more than one system or equipment, but 75% or more of the dollar amount is allocable to a single system or equipment, the code of that system or equipment shall be assigned. Otherwise, multi-system procurements shall not be assigned a specific code.

Each Department shall use only that part of Section II designated for it, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

1. Aircraft by design number within each basic mission symbol, e.g., A-4, A-5, A-6, F-4.
2. Aircraft Engines by design number within type of engine.
3. Missiles and Rockets by design number.

(Note: If an aircraft, missile or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in the Manual but agrees as to design number, the code applicable to that design number shall be assigned. For example, an RB-52 Aircraft would be assigned the code for B-52. The series symbol for an item is not used; e.g., F-111 is used rather than F-111A or F-111B.)

4. Air Force Electronics and Communications numerically by system number.
5. All Other Categories alphabetically by key word or words and by size of caliber.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeros) shall be assigned.

#### WEAPON SYSTEM

An instrument of combat with all related equipment, operating skills, and direct supporting facilities and services required to enable the instrument of combat to operate as a single unit of striking power.

## FOREWORD

The Directorate for Information Operations and Reports maintains the Defense Acquisition Management Data System which is developed from data submitted by components of the Department of Defense (DoD) on all contract transactions over \$10,000. These data are available on computer listings which have been sorted either by contractor name (alphabetical) or place of performance (geographic). The column headings are identified in this manual by letters of the alphabet. The corresponding heading on the printout is repeated for the number of positions in the field. (Column heading D is a four-position field and appears on printout as DDDD.)

This manual is intended to assist the user of these computer listings to understand the range of data presented. It is not the final source for all possible codes used in these listings. Where possible, the codes and their meanings have been displayed. For the remaining codes, it may be helpful to refer to the DoD Procurement Coding Manual (4105.61M), Volumes I and III, as well as Appendix N of the Defense Acquisition Regulation (DAR).

Page ii of this manual contains a summarization of the data elements shown in the detailed listing. Note that the first line of each segment of data identifies the contractor and the place of performance, as well as their respective codes. The identification on Line 2 applies to each award made to the contractor shown in Line 1.
